**Check the box next to the seminar you will be attending and send a check to the address below**

Jan. 21st  
 Check here if you will be attending

**Art Morrison Chassis**  
 Speak to the Chassis Expert himself. Art Morrison started his business in 1971 and this year marks their 40th anniversary. Art will be discussing chassis design, engineering, the process of creating a custom chassis and the do's and don'ts of chassis building.

Feb. 18th  
 Check here if you will be attending

**Stainless Steel Brakes (SSBC)**  
 Ray of SSBC will be discussing the braking basics from the proper installation to determining the right system for your specific application. He will also explain the process of upgrading your current system.

Mar. 17th  
 Check here if you will be attending

**Classic Instruments**  
 Classic Instruments will explain how easy it is to correctly wire your instruments in your vehicle and have years of "no hassle" instrumentation. The Team at Classic Instruments will discuss what makes Classic Instruments the right choice when you're doing "The finishing touch". They will be showing their product line, how you can design your own custom gauges and have them delivered within 48 hours.
